Science Week 2021

11th March 2021

Dear Parents/Carers,

Science Week will be taking place on the week of the 15th March. This is our opportunity to focus on making science creative and to raise its profile, by exploring ideas and investigating scientific concepts. This year's theme is '**Innovating for the Future**'. We want the children to think about some of the best inventions from the past and to embrace the creative process of innovation. The children are going to design, build prototypes and review their inventions.

To celebrate the importance of Science Week, we would like to invite all pupils and staff to dress up as a scientist on **Friday 19th March 2021** when the children will be taking part in some fun, exciting experiments!

Poster Competition

Encourage the children to get creative and enter our poster competition. They can make their poster about whatever version of this year's theme '*Innovating for the Future*' they would like. For example; it might be some of the best inventions from the past or an invention that they would like to create. Posters must be uploaded with children's details: **first name and surname, age and class**. Please hand in your poster by Wednesday 17th March to your class teacher on Google classrooms. A prize will be given to the winner of each year group.

Thank you in advance for your continued support and we are looking forward to taking part in a fun science week!

Yours faithfully

Miss Cleary
